Profile

A recent graduate seeking an opportunity to begin my career, contribute to organizational goals, and develop my professional skills in a challenging environment.

Education

07/2024 – Present	**Master's Of Computer Application** *College Of Engineering Thalassery*
06/2021 – 03/2024	**Bachelor of computer application** *Institute of human resources development*

Projects

CAB Seat sharing
A team project
The Cab Seat Sharing Project is a smart solution designed to reduce travel costs, minimize traffic congestion, and promote eco-friendly commuting by enabling users to share cab rides with others traveling on similar routes. The system acts as a digital platform that connects passengers with similar destinations or routes, allowing them to share rides in real-time or through scheduled bookings.

Launch Pad
A placement finder Application
The Placement Finder is a web-based application designed to help students easily find placement opportunities based on their qualifications, skills, and interests. The system aims to bridge the gap between students and companies, making the placement process more transparent, organized, and efficient.
It provides a centralized platform where students can view job listings, apply for placements, and track their application status, while companies and administrators can manage postings and student data seamlessly.

Courses

08/2025 – Present	**Ethical hacking** *NPTEL* The Ethical Hacking course offered through NPTEL (National Programme on Technology Enhanced Learning) is an online certification program designed to provide a comprehensive understanding of cybersecurity concepts, hacking techniques, and defensive strategies.
